

# Spring

## MAINTENANCE

### TO-DO LIST

1

#### Gutters

Repair any damaged or loose gutters, and fascia. Clear all gutters of leaves and debris.

2

#### Windows

Repairing windows, caulking and window wells can help keep AC costs lower in warmer months.

3

#### Exterior Paint

A fresh coat of paint can help protect your home's exterior from the elements.

4

#### Sidewalks and Driveways

Repair any cracked or shifted cement to reduce the chance that a guest could trip and fall.

5

#### Roof

Have a roofer check for lifting, curling or missing shingles and remove debris and built-up moss that can reduce its life expectancy.
